

## **Pluto in the Fourth House**

You drew the wild card with this rare placement. Enjoy happiness while it lasts because eventually stark, distant Pluto brings happiness to an end. There is a possibility of ill health or of sudden endings. You may experience the kind of great and true love that mortals seldom know or you may achieve almost inhuman success in some way. Your lives are a testament to what is humanly possible. However, your lives are also like a two-sided coin. What the gods give, the gods can take away. And humans are not meant always to have it all.

If and when things fall apart, the way to genuine happiness may be to face and confront whatever ghosts remain from your past, ghosts that may be haunting your present. A gentle therapist may help you to come out the other side, to reclaim and embrace your simple humanity.
